

TAISIYA

Botanical Characteristics

Taisiya is a medium-early high yielding table potato variety with perfect and uniform size distribution. Very attractive because of bright and smooth skin. Suitable for washing and pre packing.

Maturity

Medium-early

Plant

Medium height

Fairly rapid development

Fairly good cover

Inflorescences rather few

Light red-purple flowers

Tubers shape

Oval

Very shallow eyes

Large

Skin pale-yellow

Flesh pale-yellow

Yield

Very good

Quality

Fairly firm texture

Fairly free from discoloration

Average dry matter content

Blight

Foliage slightly susceptible

Tuber slightly susceptible

Virus Y

Very good resistance

Golden nematode resistant A (Ro1)

Common scab slightly susceptible

Drought slightly susceptible
